How did it come that evolution developed cognitive mechanisms that produce behaviour that is evil or morally bad, causing pain and suffering to so many? The DT model will not rely</p>

exclusively on philosophical and theological theories, but it will be open for scientific insights that suggest reconsideration of the classical viewpoints in theodicy, in this way having a dynamic structure.

3. *Analysis of contribution of volunteering and donations to the development of a welfare mix health care model in the Republic of Croatia* (Doctoral Research, 2021 - 2023)

Researcher: Šimunković G.

Research aim: to evaluate the contributions of volunteering and donating to the development of the combined model of health care in the Republic of Croatia.

Research questions:

**Partnership regarding the Centre of excellence for integrative Bioethics ([here](#)):**

The Scientific Centre of Excellence for Integrative Bioethics has been founded as a constituent of the Faculty of Humanities and Social Sciences at the University of Zagreb.

The Center of Excellence for Integrative Bioethics works through a network of partner institutions that co-develop all of the Centres' activities. The scientific units of the Centre are:

- Research and Documentation Center for European Bioethics “Fritz Jahr” (University of Rijeka)
- Department of Social Sciences and Medical Humanities (University of Rijeka)
- Centre for Integrative Bioethics, Zagreb (University of Zagreb)

- Centre for Integrative Bioethics, Split (University of Split)
- Centre for Integrative Bioethics, Osijek (University J. J. Strossmayer of Osijek)
- Referral Center for Bioethics in Southeast Europe (Croatian Philosophical Society, Zagreb)
- University Center for Integrative Bioethics (University of Zagreb)

The scientific work of the Center is based on the concept of integrative bioethics (developed in numerous Croatian and international projects) and guides its work according to the approved scientific program which encompasses different aspects: scientific research, development of scientific infrastructures, education, publishing activities, scientific dialogue, international cooperation, and implementation of research results.

As special partners and collaborators, we would like to highlight precisely the Faculty of Humanities and Social Sciences at the University of Zagreb. The Center of Excellence for Integrative Bioethics was a co-organiser of the Lošinj Days of Bioethics and a co-organiser of the International Annual Award Fritz Jahr for Research and Promotion of European Bioethics.

**Partnership regarding the** Fritz Jahr Documentation and Research Center for European Bioethics, Faculty of Health Studies, University of Rijeka ([here](#)):

The documentation and research center for European bioethics "Fritz Jahr" was founded in May 2013 at the University of Rijeka, and since 2018 it continues to work as part of the Faculty of Health Studies of the University of Rijeka. From 2014 to 2023, the Center was part of the Scientific Center of Excellence for Integrative Bioethics, one of the first seven scientific centers of excellence in the Republic of Croatia.

The Center's activities are oriented toward the implementation of research projects in the field of bioethics, the promotion of European bioethics, and the regional, European and global positioning of Rijeka and the University of Rijeka on the bioethics map of the world.

The Center, together with the Department of Social Sciences and Humanities in Medicine of the Faculty of Medicine of the University of Rijeka and the Croatian Bioethics Society and other partners, is the co-organizer of the Rijeka Days of Bioethics – the longest-running bioethics meeting in Croatia. Also, the Center is the publisher (together with the Faculty of Medicine of the University of Rijeka and other cooperating institutions) of the journal *Jahr – European Journal of Bioethics*.

As part of the Center, there is a library with several thousand books in the field of bioethics/medical ethics, history of medicine, and other fields.

During 2023, invitation letters were sent to about 40 selected UNESCO Chairs for the purpose of cooperation (which would include the exchange of publications and experiences, application of joint projects, and more). The first offered opportunity was conference Rijeka Days of Bioethics (RDB) 2023. One of the Chairs gave an invited lecture during the RDB (Mara de Sousa Freitas, Director of the Institute of Bioethics, Universidade Católica Portuguesa).
